Time Schedule

Submission Deadline: November 1, 2020

Peer Review (First Decision): December 1, 2020

Revision by Authors: December 15, 2020

Final Decision for Publication: December 30, 2020

Publication of Special Issue: January 20, 2021

Language: English

Peer Review Procedure

Double blind

Publication Fee

To cover the operating costs, authors of the accepted papers will be required to pay 97 EUR per paper. Hard copies of the ESJ Special Edition are included as part of the cost.

Overview of the Special Edition

This special issue on investigating the “Actual Problems of Medicine and Dentistry” is a way of celebrating ESJ 10th year anniversary. Consequently, we have realized that global health plays an increasingly crucial role in both global security and the security of the population. However, the pace of global development will slow down in few years to come after the Post-COVID-19 period. Modern medicine is unimaginable without high-quality research based on evidence-based medicine methods, population studies, disease risk assessment and prediction of treatment outcome, which are very important for disease prevention and timely treatment.

Papers published under this special issue can use a variety of research methods. The suggested themes include, but are not limited to the following:

- Morbidity Risk Assessment in Target Populations
- Modern Methods of Treatment
- Predicting Disease Manifestation
- State Insurance Challenges
- Immunological Characteristics of the Disease
- Studies on Covid-19

Types of Manuscripts Acceptable

Research articles, review of literature, and case report
